ANALYSIS OF MOODLE QUIZZES COMPARED TO GRADES

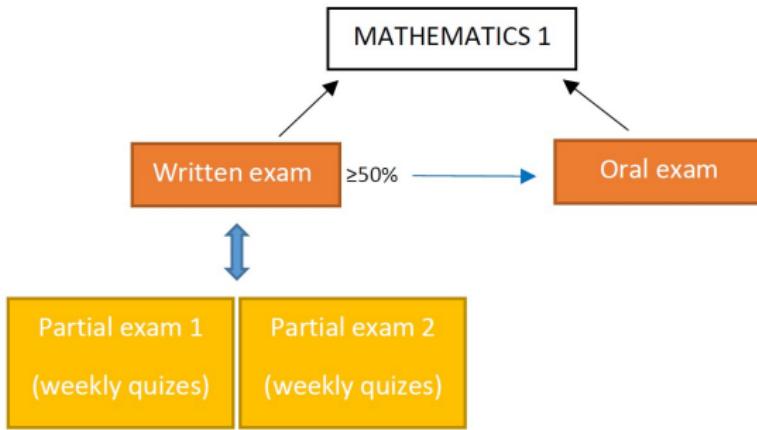

Mojca Premuš

University of Civil and Geodetic Engineering

University of Ljubljana

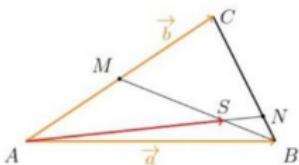

EAMS 2022

Undergraduate studies, required course

V trikotniku ABC označimo $\vec{a} = \overrightarrow{AB}$ in $\vec{b} = \overrightarrow{AC}$. Točka M razpolavlja stranico AC , točka N pa del stranice BC v razmerju $1 : 4$. Nai je S presečišče daljic BM in AN . Izrazi \overrightarrow{AS} z vektorjem \vec{a} in \vec{b} .

- $\vec{AS} = \frac{2}{3}\vec{a} + \frac{1}{5}\vec{b}$.
 - $\vec{AS} = \frac{2}{3}\vec{a} + \frac{1}{6}\vec{b}$.
 - $\vec{AS} = \frac{3}{4}\vec{a} + \frac{1}{5}\vec{b}$.
 - $\vec{AS} = \frac{3}{4}\vec{a} + \frac{1}{6}\vec{b}$.

Vektor \vec{AS} izrazimo na dva načina: $\vec{AS} = \lambda \vec{AN} = \frac{4}{5} \lambda \vec{a} + \frac{1}{5} \lambda \vec{b}$ in $\vec{AS} = \vec{AM} + \mu \vec{MB} = \mu \vec{a} + \left(\frac{1}{2} - \frac{1}{2}\right) \vec{b}$. Uporabimo se linearno neodvisnosti vektorjev \vec{a} in \vec{b} , da dobimo sistem dveh enačb za dve neznanki in iz njega izračunamo ali λ ali μ , izrazimo \vec{AS} .

Poskus s še enim vprašanjem, kot je ta

Dani sta ravnila $2x + y - 2z = 12$ in premica $\frac{x-15}{2} = \frac{y}{3} = \frac{z-6}{2}$.

Njuno presečišče je točka $A(1 \textcolor{red}{\times}, 2 \textcolor{red}{\times}, 3 \textcolor{red}{\times})$.

Najprej zapišemo parametrično obliko enačbe dane premice: $x = x_0 + at, y = y_0 + bt, z = z_0 + ct$.

Nato vstavimo izraze za x, y, z (npr. $x = x_0 + at$) v enačbo dane ravnine. Rešitev dobljene enačbe $t = t_0$ vstavimo v parametrično obliko enačbe premice in dobimo koordinate presečišča premice in ravnine.

Poskusi s še enim vprašanjem, kot je ta

Naj bosta $A = (0, 3)$ in $B = (1, 4)$.

$$A \cap B = [\text{ } \div \text{ } \times \text{ } 1 \text{ } \div \text{ } \checkmark \text{ } , \text{ } 3 \text{ } \div \text{ } \checkmark \text{ }] \text{ } \div \text{ } \times$$

$$A \setminus B = [\textcolor{red}{\cancel{+}} \textcolor{red}{\cancel{\times}} \textcolor{black}{1} \textcolor{black}{\cancel{+}} \textcolor{red}{\cancel{\times}} \textcolor{black}{3} \textcolor{black}{\cancel{+}} \textcolor{red}{\cancel{\times}} \textcolor{black}{) \cancel{+}} \textcolor{red}{\cancel{\times}}$$

Vaš odgovor je delno pravilen.

Pravilno ste izbrali 6.

Uporabimo definicije operacij med množicami:

$$A \cup B = \{x \mid x \in A \text{ ali } x \in B\}$$

$$A \cap B = \{x \mid x \in A \text{ and } x \in B\}$$

$$A \setminus B = \{x \mid x \in A \text{ and } x \notin B\}$$

$$B \setminus A = \{x \mid x \in B \text{ and } x \notin A\}$$

Poskus s še enim vprašanjem, kot je ta
